About me

I am a young men who wants to apply what requires constant learning. Curious about the world around him and self-taught in general. I currently work at **SHS Consultores** as developer.

Interests

I seek to develop as a person through learning and productivity. My current goal is studiyng about **neural networks** and **convolutional networks**, so I am starting a **deep learning** course.

Personal skills

- Proactive
- Responsible
- Professional
- Creative
- Teamwork
- Persevering

Julián Mª **Galindo Álvarez**

Education

2014-2019	**Double Degree in Physics and Mathematics**, University of Seville. Seville, Spain. Average grades:

- Mathematics: 8.31/10
- Physics: 8.15/10

2018-2019	**Internal student,,**, Geometry and Topology Deparement.. University of Seville, Seville, Spain. *Mathematical Foundations of General Relativity*, tutored by Dr. Alfonso Carriazo Rubio.
Oct. 2016	**Workshop "*Ramsey Theory and Related Topics*"**, Institute of Mathematics of the University of Seville (IMUS). Seville, Spain. Participion and organization.
2017	**"*Develop your abilities*" program**, Social Council. University of Seville, Seville, Spain. Training program for the development of transversal professional skills and management skills.

Interests

I seek to develop as a person through learning and productivity. My current goal is studiyng about **neural networks** and **convolutional networks**, so I am starting a **deep learning** course.

Personal skills

Also

→ I have my own car (**B** driver license).

→ Availability to travel.

→ I have given private classes in Mathematics and Physics to students ranging from children to adults and from primary to university, obtaining the results they were looking for, with a 100 % of success.

→ Among my hobbies are drawing, both traditional and digital, audiovisual editing and practicing sports such as basketball and tennis.

In the future I want my job to be fully part of my life, a place where I can enjoy what I'm doing while helping other people to have a better life. I am currently interested in neural newtworks because apart of their current boom, they merge perfectly deep Maths an programming.
